ABOUT ME

A versatile full-stack developer with a strong foundation in software engineering, systems/networking, databases, and data/AI, capable of designing, developing, optimizing, and securing modern applications.

EDUCATION

Currently

BACHELOR'S DEGREE IN SOFTWARE DEVELOPMENT, SUPMTI

I am currently pursuing a Bachelor's degree in Software Development, focused on advanced object-oriented programming, system and network administration, database management, artificial intelligence, and software engineering. This program strengthens my skills in building efficient, secure, and scalable applications while preparing me for real-world development and data-driven project

2022-2024

DIGITAL DEVELOPMENT SPECIALIST ,OFPPT

I completed a diploma as a Specialized Technician in Digital Development, where I gained strong foundations in algorithmics, web development (HTML, CSS, JavaScript, PHP), object-oriented programming, and database design. This training gave me a solid technical base creating dynamic, user-friendly web applications.

WORK EXPERIENCE

2024/11-
2025/04/

ELECTROGENA | WEB DEVELOPER AND IT LEAD

I created a landing page for the company and managed commercial documents such as quotes and invoices. I was also responsible for updating and maintaining business records. Additionally, I provided administrative support using advanced office and organizational skills.

2024/04-
2024/05/

OCP GROUP| WEB DEVELOPER (INTERNSHIP)

I developed a web application for managing fire extinguishers. The project centralized all fire-extinguisher data into an easily accessible database and improved safety processes through digital solutions. I also implemented real-time updates for extinguisher status and locations, contributing to more efficient monitoring and faster decision-making.

SKILLS

- Web Design
- Design Thinking
- Wireframe Creation
- Problem-Solving
- Computer Literacy
- Front End Coding
- Project Management Tools
- Strong Communication
- Leadership
